

### Scotland and New Technology

A very short video clip of how the government encouraged new companies to come to Scotland in the 1960s.

Watch the video and then fill in the gaps. They are all small words.

When Labour came to power in 1964, they also attracted new industry to Scotland by offering financial help.

Other American electronic firms joined IBM and Honeywell, hoping to exploit the European market.

These new industries created employment for those who had lost jobs in traditional industries such as textiles.
